

BUFF & GLAZE **Machine Cleaning Wax**

Description :

Buff & Glaze is ideal for restoring lightly oxidized finishes in a single operation. This product contains mildly abrasive cleaning agents as well as some waxes which have the property of conditioning and sealing all types of paint.

The cleaning wax can also be used as a pre-cleaning or as a wax. Its formulation contains carnauba wax and cleaning agents for a perfect combination and applies exceptionally well to new or used cars.

Advantages :

- Cleaning wax is an excellent product for users who desire a "CARNAUBA" finish.
- Can be applied by hand or with a polisher.
- Can treat up to 4 medium size vehicles per 500 ML.
- Offers a minimum durability of 3 to 4 months.

Instructions :

* Start with the roof and continue with the hood, the trunk and the sides.

With Polisher

- 1- Apply a good quantity of "Buff & Glaze" on the surface to be treated using the 40/60 wool velcro sanding pad 1 ply (# 4030). Spread the product on approximately 0.25m² (2 squares feet) before operating the polisher.
- 2- Use a variable speed polisher, i.e. from 1200 to 1500 rpm. While applying medium pressure, let work the polisher slowly until the appearance of a shiny finish, if necessary wipe with a microfiber cloth.
- 3- For best results, repeat step (1) using a black foam finishing pad (velcro # 4237). Reduce the pressure and increase the speed to 1800 rpm to buff the polished surface.

By Hand

- 1- Apply the product on the painted surface with a wet wax applicator and let dry to obtain a fog. (5 minutes).
- 2- Remove the residue with a clean polishing cloth. .

* For highly oxidized finishes, use the appropriate liquids or polishes for this type of oxidation.

It is strongly recommended to clean your polishing pads using the pad wringer (no. S2000) to have the least amount of swirls and holograms possible.
