

HD RIM

Strong Acid Rim Cleaner

Description :

Auto-Chem HD Rim Cleaner is a powerful acid-based formula. Use as a shock treatment to quickly and effectively remove brake dust from stock rims. Ultra fast cleaning without the need to scrub. Dissolves rust, grease, dirt and brake dust in less than a minute. Restores yellowed rims to their original luster.

The rim cleaner contains a special blend of penetrating agents that dissolves dirt and contains a neutralizing substance that becomes active on contact with water when you rinse it off. Formulation reinforced with thixotropic agents that grip the vertical surface for better cleaning.

Advantages :

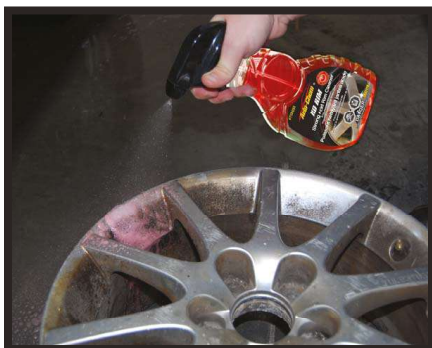

- Powerful concentrated formula
- Easy and quick cleaning, spray and rinse
- Dissolves rust and brake dust
- Shock treatment

Instructions :

Wet the surface to be cleaned with water and spray HD RIM directly on the rims. Wait a minute before rinsing off with a powerful jet of water. Wipe dry with a cloth. When the rims are very dirty, apply the product and scrub with a wheel brush. Rinse with a powerful jet of water. DO NOT LET DRY ON THE SURFACE.

NOTE : Proceed one wheel at a time so as not to leave the product on the wheels for too long. Test it first on an inconspicuous area. If the rim finish changes in appearance or if any other negative reaction occurs, do not use this product.

Do not apply this product to cold or hot surfaces. Do not let the product dry on the surface. Do not apply this product to wheels with a colorless coating that is cracked or chipped as it may discolor the wheels. Do not apply to polished aluminum rims, aftermarket or anodized rims because a matte finish may result.
